| <b>Starter</b><br><b>Pages 86-87</b>                                                                                                                                     | <b>1. Add and subtract decimals within 1 (1)</b><br><b>Pages 88-91</b>                                                                                                 | <b>2. Add and subtract decimals within 1 (2)</b><br><b>Pages 92-95</b>                                                                                                       | <b>3. Complements to 1</b><br><b>Pages 96-99</b>                                                                                                    | <b>4. Add and subtract decimals across 1</b><br><b>Pages 100-103</b>                                                                                | <b>5. Add decimals with the same number of decimal places</b><br><b>Pages 104-107</b>                                                                                |
| <b>Discover</b><br><b>Subtract decimals with the same number of decimal places</b><br> | <b>Discover</b><br><b>Add decimals with a different number of decimal places</b><br> | <b>Discover</b><br><b>Subtract decimals with a different number of decimal places</b><br> | <b>Discover</b><br><b>Problem solving with decimals (1)</b><br> | <b>Discover</b><br><b>Problem solving with decimals (2)</b><br> | <b>Discover</b><br><b>Decimal sequences</b><br>                                  |
| <b>6. Subtract decimals with the same number of decimal places</b><br><b>Pages 108-111</b>                                                                               | <b>7. Add decimals with a different number of decimal places</b><br><b>Pages 112-115</b>                                                                               | <b>8. Subtract decimals with a different number of decimal places</b><br><b>Pages 116-119</b>                                                                                | <b>9. Problem solving with decimals (1)</b><br><b>Pages 120-123</b>                                                                                 | <b>10. Problem solving with decimals (2)</b><br><b>Pages 124-127</b>                                                                                | <b>11. Decimal sequences</b><br><b>Pages 128-131</b>                                                                                                                 |

**12. Multiply by 10**  
*Pages 132-135*

**13. Multiply by 10, 100 and 1,000**  
*Pages 136-139*

Divide by 10

Discover

100 ÷ 10 = 10

100 ÷ 10 = 10

**14. Divide by 10**  
*Pages 140-143*

**Divide by 10, 100 and 1,000**

**Discover**

**15. Divide by 10, 100 and 1,000**  
*Pages 144-147*
